HAKIM REDJEM

Full-Stack / AI Developer

Toulouse, France | +33 7 89 58 95 18 | hakim.redjem@epitech.eu
github.com/vulkreon | linkedin.com/in/hakim-redjem | Driving licence

PROFILE

Trained at EPITECH, with work experience in AI R&D and full-stack development, I am looking for a first permanent position where building applications and working closely with business teams are at the heart of the job. Available immediately.

SKILLS

Languages: C#, Python, TypeScript / JavaScript, C++, Java, C, Rust, SQL

Backend & APIs: .NET / ASP.NET, Node.js / Express, REST API design, MongoDB, SQL

Frontend: Angular, React

AI & Data: AI model integration (PyTorch, Whisper, TensorFlow, OpenCV)

DevOps & Cloud: Git, Docker, Jenkins, CI/CD, Azure, AWS, basics of Kubernetes

Testing: Unit tests written since the start of my EPITECH studies (Criterion, Jest…)

Spoken languages: French (native), English (fluent, TOEIC 920/990), Spanish (B2), Japanese (conversational)

WORK EXPERIENCE

AI Research & Development Intern - Medinbox, Toulouse | April - August 2023

- Built a Python pipeline (PyTorch, fine-tuning of the Whisper model) to automatically transcribe and index medical videos and cut down on manual work.
- Developed the full-stack web interface (ASP.NET / Angular) that exposes the pipeline, with the service running in Docker.
- Added a specialised chatbot to the web interface, which was presented at the ARCH Symposium 2024.
- Worked in a team with code reviews and GitLab issue tracking.

Occasional Web Development Instructor - ISEG, Toulouse | March - April 2023

- Supervised a group of students during an intensive code camp (HTML, CSS, PHP, SQL) until they delivered their own e-commerce platform.

Full-Stack C# Developer Intern - BPCE-IT, Toulouse | July - December 2021

- Developed the internal tool “Power10” (C# / .NET) on my own; it is used by level 1 and 2 IT support.
- Integrated the ServiceNow, AirWatch, Windows AD and SharePoint APIs. Talked with the users to collect their needs.
- Wrote the technical and user documentation.

PROJECTS

- **EVA Scrim Manager (Node.js, TypeScript, React, MongoDB, Docker) - 2026:** Multi-tenant platform with a REST API, OAuth2 authentication and Docker deployment to a registry. Made for members of EVA arenas, to help them organise matches between teams.
- **AREA (TypeScript, Express, React, MongoDB, Docker) - EPITECH:** Containerised microservices architecture with a trigger/action engine between third-party services (Spotify, GitHub…).

EDUCATION

Engineering degree through VAE (validation of prior experience), in progress, CESI

Bachelor + engineering cycle (up to 5th year), EPITECH Toulouse | 2020 - 2025

University exchange, Shibaura Institute of Technology, Tokyo | 2023 - 2024

“Honours” distinctions on CodinGame - Python, C, C++, Java, TypeScript, JavaScript.
